The space station has the most advanced artificial intelligence, and when time progresses things start to take a turn for the worst. The artificial intelligence begins to malfunction, and tries to kill you at every opportunity given. Alone, you must survive long enough to escape the station and make it back to Earth, but do you have what it takes?

Played the first version on my iPhone and got my whole family addicted to it. Great puzzle game series and now with 2 on the PC I got excited and rightly so. So much better with great updates and additions. Really enjoyed playing this one. And so did the family.. I bought this DLC just for that ship in a bottle for my cabin

10V10. Big improvements from the first nice homage to old skool horror games

<https://youtu.be/wzAdBGOi4-Q>. Ok, so this was just \u20ac2, but it is still a techdemo. Gigantic latency issues so unless you are playing slow rock music or blues (forget faster metal like beats) and the symbols flail around if you get too close.

[If you want to let your kids experiment with playing drums before you buy them a drumset, fine - buy this for them.](#)

[If you already have been playing drums for a while and want a VR experience because of space issues in your home - this will just make you sad.](#)

3 minutes with this was enough for me, i'll stick with my TD-11 KV.. Yeah Sorry I played this along long time ago.. in todays world the graphics are horrible and even though they have files to support the thrustmaster joystick sidewinder etc they dont seem to work at all.....

[Please unless you like spending hours trying to revive this game to work in todays world.. take a PASS the video on the store front looks far better than you will get on your comp..... Derelict is game which for the 2 hours I have already played, I enjoyed it. However I have no desire currently to go back and play more because of the lack of things to find in this "universe". The game itself has huge potential but really that's all it is, potential. I am praying for updates to expand what is already here because the concept is solid and what is there already is really good but there just isn't enough to justify buying it at this stage. I wouldn't recommend this yet but I would say to keep this on your radar and check back when hopefully more is added to the game.. The sounds, the graphics, and the mechanics in this game are all so utterly generic. I just can't into it.. this great dlc. First time playing this game and waited for over 15 min to find a game .. Still can't find a game .. sigh bought this game some time ago, installed but never got around to playing it yet.](#)

[other day i turned it on deciding to begin my crusade into this game, and i must say it was well worth the wait <3](#)

[if your a fan of arena shooters like unreal tournament, quake and the various other games of its style this game highly reminds me of them, it may be a top down arena shooter but it still brings back the feelings of playing those all the time <3](#)

[to put it simple if you like arena shooters, there is a few game modes.](#)

[deathmatch, team deathmatch, capture the flag, last man standing, wanna see more modes? suggest them to the developer.](#)

[guns wise you have all sorts of guns to pick from, from simple minigun to a rocket launcher or even a laser sniper rifle.](#)

[oh and lets not froget the flamethrower.](#)

[the bots wise have been tuned to were you will die ALOT if your not careful.](#)

[reccomend you try using a controler well playing this, twinstick shooter of course, or you can try toughening it out via mouse and keyboard.](#)

[the servers are online some PVE loaded with bots, some are players only, which u can also make your own servers.](#)

[which achivement wise flying thru the ranks isnt that tough you just need to play a bit.](#)

[overall id reccomend this game to anyone whos a fan of arena shooters, play it on off or marathon it playing 60 min matches, which i myself ran a 60min match the fun didnt die off at all, as its just that addictive.](#)

[oh and for those who arent so good at arena shooters, he added handicaps you can set bot settings from easy to hard.](#)

[or even lower there speed , or lower your speed if ud like a handicap.](#)

[my advice, test out the demo if you like it buy it and bring friends for a crazy shootout <3](#)

[if i missed anything about this game please leave a comment, also i should note there is meetup groups on steam which you can find players via as usualy the servers dont have many playing, but that doesnt mean the players arent there.](#)

[there just waiting for the invite to play <3](#)

While the IndyCar Pack for GRID 2 is a small addition to the game it does add a lot of interesting factors into the game. After purchasing the IndyCar Pack you'll receive two routes at the world famous Indianapolis Motor Speedway Circuit, two vehicle liveries for the Chevrolet Camaro SS and Corvette Z06, and the IndyCar itself. While the IndyCar and the tracks added are fun, it's not totally worth seven dollars.. Think of a game like Asteroids, Now think of a game like Asteroids but where the asteroids follow you around relentlessly trying to smash into your face, and your only defence is a majestic wave of destruction; This is Shudder.

Shudder may seem simple when beginning, but as you're playing, you quickly come to realise that this fast-paced game won't give you much time to think as it tests your reactions and ability to predict ahead. This game is difficult, but after a few attempts, you'll start to get the hang of it, you'll notice your abilities peek as you stave off the relentless enemies with your waves of slaughter; show them what you're made of!. you can beat this game in about 13 hours its alright I bought it in a steam bundle way back when, the story is interesting and its an arcade shooter its not bad but its not THE BEST. One thing you have to know is if you are in a mission and you die half way in you have to start all the way in the beginning so like maybe 5 or 10 minutes of hard work gone so keep that in mind.

I want to give this game a maybe
for new people on steam get it and enjoy
for people like me with 600 plus games in the account skip

I give it a 5/10

HEY look at me I am a fighter pilot from WW2 yayyyyy. This game is amazing!!!! Omg best CCG I have ever found yet. =]. Fun but gets boring pretty quickly 5V10. Nice with friends. Give it a shot.. This is pretty much the only DLC here, that's worth the price... when it's on sale.

But after the "Age of Destroyer" update, i wouldn't recommend buying any DLC here... until you have played the game, and reached a destroyer without spending money.

This DLC helps lessening the grind on the way a bit, if you use the GS you get to buy a 1 month licence... but when the licences runs out, you're really going to feel the pain of the increased grind at every turn.

When the Devs start improving the game again with updates, i might change my review. But looking at the latest updates and "events", it's a clear thumbs down until further notice.

I don't regret spending the money on this DLC, but i'm not going to recommend it either.. It's Pantera! What else can I say. Get it already.. Disciples is a great game. The game offers 4 playable races being the Empire, Demons, Dwarves or Undead. The game is interesting because you start with a hero being a Warrior, Mage or Archer all with their own game effecting benefits and you assemble a party and level them up. You also build up your castle with specific buildings to level up your party, example being Footmen needing a Stables to level up into a Knight. With that said you need resources and to acquire resources all you need is to convert land underneath easily noticed resources.

One thing to note is: I've played all Sagas(campaigns) all offering challenge, but something I found a little disappointing is some of the maps were reused, just the advantage was flip flopped.

Overall I rate this game 8/10 - Flawed but amazing nonetheless.. I didn't really enjoy the game I doesn't really tell you what to do and the graphics are just bad. 4V10
